## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 24, 2006 has been entered.

### ***Response to Amendments***

2. Claims 1 and 7 are amended. Claims 2, 6, 8-16, and 18 are cancelled. Claim 19 is new. Claims 1, 3-5, 7, 17, and 19 are now pending.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 19 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Art Unit: 1773

Newly added claim 19 recites that the particles are dispersed "onto at least one side of a rolled linoleum sheet having no backing sheet". There is no support, in the original disclosure for the rolled linoleum sheet "having no backing sheet". The recitation that the rolled linoleum sheet has "no backing sheet" is essentially a negative limitation and any negative limitation or exclusionary proviso must have basis in the original disclosure. The mere absence of a positive recitation is not basis for an exclusion. The Applicants must either point to specific support or cancel the new matter in response to this Office Action.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 3-5, 7, 17, and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claims 1 and 19 recite "mixed mass" particles. It is not clear, from either the Specification or the claims, what is meant by "mixed mass particles".

Claims 1 and 19 further recite that the particles are "substantially warp-free" pressed into the linoleum sheet. What is meant by "substantially warp-free" pressing? How does one determine whether warp-free pressing is taking place? Appropriate clarification or correction is needed.

***Response to Arguments***

5. Applicant's arguments with respect to claims 1, 3-5, 7, 17, and 19 have been considered but are moot in view of the new ground(s) of rejection.
